In today's world with the continuous advancement in technology, unpredictable market and worldwide spread of opportunities; the best we can do for the upcoming generation is to instil them with values and skills that they will need in a future that we cannot predict. The college emphasises on excellent level of education and extra curricular activities to meet over all development of students their managerial skills and inter personal skills and all this is possible due to commitment and dedication of the teaching and non teaching staff at CSC.

Today as I see CSC standing tall in Powai I feel proud to exercise my father's dream to share his philosophy among the youth and inspire them to contribute to country's prosperity efficiently.

I feel proud when CSC follows a policy of zero tolerance in compromising quality education, security of students in campus and exposure to activities that enhances the ability of students to learn and relearn.

It gives me immense pleasure to resonate the inspiration I get from my father through this institute and nurture the youth of the country leading towards creating a better tomorrow for all.

## **LIFE OF A STUDENT.... BEST DAYS OF LIFE**

Every child passes through different stages of life. One of these stages is being a student. Student life is considered as the most crucial period of our life. Our future dreams, desires and hopes depend upon it. Student life is a period of preparations for future. It is a period of education. At this time, our mind is like clay. Clay is a soft thing and the potter designs various things out of the clay. Like clay, our mind can also be shaped in different ways.

Once the pots are made, their shape cannot be changed. As we know the famous proverb "Make hay while the sunshines" Likewise, once our character is formed in one way, it cannot be changed easily. If we make right use and receive good education during our student life, we shall be successful in future. On the other hand, if one isn't serious at this time, he can't achieve his goals. Students, therefore, should be very careful. We must think seriously before every step we take. We must learn new things as much as possible at this period. Learning stage is the best and crucial stage for all of us. Students are the future leaders of a nation. The prosperity of a nation depends on its students. We have a responsibility to acquire proper education, maintain good character and live a respectable social life. Obedience, diligence, regularity, and punctuality and forbearance are the important parts of student life. We must learn perseverance; it is the root of all success. If we are idle and cannot move on according to time, we can achieve nothing. The most important factor that affects the student life is the value of time. Being a student we should do everything on time as it never waits for anyone. Obeying one's parents and teachers and respecting and loving one's elders are the great virtues of a student. Another important part of a student's life is his/her social life. A student must have good discipline and he/she must be co-operative with everyone and this is seen through project work as we work in teams. Social life influences our character in many ways. Many of us enter college expecting good times, friendship and a good sense of direction. We soon find out that colleges come with challenges and struggles because of the great demands and expectations that are put on the importance of education. Students experience a great deal of stress many times. Thus, it is very important for them to manage a proper routine and stick to it. Student life is the best part of an individual's life. At this time our main task is to study. We should stop thinking of anything else and concentrate on education. Education must be given the top priority. Student life at the same time is also the best and enjoyable time of our life which no child experiences at the start but when soon finishes his graduation feels for it but nothing can be done then as our student days are over and time to be a responsible citizen of the country and no time for any fun or plays. We all cry for it or feel for it but time gone once waits for no one and no time machine to go back there and enjoy those moments back & then we all sing from our hearts the lines.....

## **DREAMS HIDDEN IN GHOONGHAT!!**

As rightly asked “Who decides the expiry date of a woman’s dream?” No authentic answer has yet been found out for this complicated question since the barriers are countless. Last day I got a chance to have a very deep conversation with my friend who began talking about their “early marriage” traditions and some strange cultures which left me shocked! She described me about their culture in which the housewives are strictly expected to cover their face and head with a veil which is termed as “Ghoonghat”. Through her, I got to know that Ghoonghat is a symbol of Modesty, Honor and Shame which strictly forbids the women there to show their faces before elder men in the family and the society.

There was a time when the women used to consider the four walls of their houses as their world. Their world began and ended there. Without uttering a word against any unwanted rules imposed on them, they were ready to suffer anything for the reputation and completion of her family. But now? The world speaks about Independence, The nation speaks about Dreams, and the fundamental rights declares Freedom! The question is: To whom? Independence, Dreams and Freedom are only the promises given to selective people who have got the power to conquer? Then I think, this so-called Democratic country is no different from totalitarianism (with due respect to my nation!). Here, when we are nominating a woman as the next RBI governor, when we are looking forward for our Indian nationalist woman player to win Olympics, we also need to remember about those women who doesn’t have any choices left while some are still being threatened in the name of dowry till today!!

There is a world behind Ghoonghat and millions of visions and dreams of a woman hidden in it. Let it never be a cage for them due to which they have to camouflage themselves into a person they are not and get ruined by the culture! Culture definitely has got a core role in moulding one’s character but let it never imprison anyone’s dream!! Let our women look beyond the cage and see the world they have always dreamt to be in. Let us stand firm together to destroy the walls of unwanted cultural practices that stops someone to achieve their dreams because it is certain that if given a chance, a revolutionary may rise from the world of Ghoonghat who may lead the era with passion and Fire!!!!

## **Keep Calm and Stay Strong**

In life, we all go through hard times, times where our strength and fortitude are tried and tested.

These tough times can come in many forms: going through a divorce or breakup, losing a loved one, financial hardship, job loss or struggling to overcome a life challenge or obstacle.

While enduring these, it can feel impossible to find your inner strength, always remember, if you dig deep enough, it's there. Strength does not come from winning. Your struggles develop your strengths. When you go through hardships and decide not to surrender, that is strength.

Learn to accept. To be successful, you must accept all challenges that come your way. You can't just accept the ones you like. Understanding the formula for success is simple. Just "double your rate of failures", because failure isn't the enemy of success. Failure gives you the opportunity to Start Again. When you fail you exactly know what not to do next time.
